MEET THE NEEDS OF TODAY AND TOMORROW. Can we help you develop your workforce of the future? Recruiting a Redeemer University College intern is a great opportunity for early identification of talent. Students receive relevant work experience while you, the employer/community partner, benefit from their fresh perspectives.

Students in the Environmental Science and Studies program choose one of two streams: a humanities emphasis or a science emphasis. Students can respond to significant environmental challenges that are complex and of ever-increasing importance to our society. They are taught to integrate scientific, political, theological, and aesthetic perspectives. For third and fourth year students, an internship gives them an opportunity to further their knowledge and skills in an applied setting, while earning academic credit. Environmental Studies is part of the Environmental Science and Studies Department and it is offered as a Bachelor of Science degree program or as a Bachelor of Arts degree program.

EXPECTATIONS

Employers commit to providing a learning experience relevant to the student's area of study and career development. Responsibilities of the employer supervisor include:

- Provide an *Internship Work Proposal*
- Sign the *Internship Agreement*
- Meet with the faculty supervisor
- Initiate the orientation process
- Prepare weekly learning activities
- Identify opportunities for the student to develop core competencies
- Offer guidance, mentoring, and feedback
- Schedule regular meetings with the student
- Review the student's progress
- Complete and submit the evaluation to the faculty supervisor
