MEET THE NEEDS OF TODAY AND TOMORROW. Can we help you develop your workforce of the future? Recruiting a Redeemer University College intern is a great opportunity for early identification of talent. Students receive relevant work experience while you, the employer/community partner, benefit from their fresh perspectives.

Students in Health Sciences bring a broad exposure to this diverse and dynamic field of study, establishing the building blocks for a variety of careers in health sciences. They are strong in biology, chemistry, and psychology and are exposed to the spiritual, psychological, environmental, and social factors of human health and well-being. For third and fourth year students, an internship gives them an opportunity to further their knowledge and skills in an applied setting, while earning academic credit. Health Sciences is a Bachelor of Science degree program within the Health Sciences Department.

EXPECTATIONS

Employers commit to providing a learning experience relevant to the student's area of study and career development. Responsibilities of the employer supervisor include:

- Provide an *Internship Work Proposal*
- Sign the *Internship Agreement*
- Meet with the faculty supervisor
- Initiate the orientation process
- Prepare weekly learning activities
- Identify opportunities for the student to develop core competencies
- Offer guidance, mentoring, and feedback
- Schedule regular meetings with the student
- Review the student's progress
- Complete and submit the evaluation to the faculty supervisor
